

Governor Koike agrees for nuclear weapons! She is the enemy of Hiroshima!

I am a single mother. I had been working as a non-regular worker at the restaurant in Tokyo Metropolitan Government Building.

At the end of this March, Governor Koike terminated housing compensation for refugees from Fukushima. That means "Return to the high dose area!" Can you believe that?

I definitely disagreed with her decision. I started gathering signatures at my workplace to oppose to the radiation exposure and "forced" return. Then, guess what happened to me. I was fired by Koike!

Governor Koike is the person that has declared "There is enough choice for nuclear arming." She is allied to Abe who is willing to promote nuclear weapons and nuclear power plants. Hiroshima's anger and Fukushima's anger are the same. Our anger against Prime Minister Abe and Governor Koike is the same.

I never permit the unfair dismissal! So do the members of my labor union. We have just formed the association to castigate the Tokyo Metropolitan Government. If you agree with us, let's fight together!

I was fired by Koike!

Take part in the signature and fund-raising campaign!
